

Pneumatic Locking Devices (Swing and Sliding)

JFE Security offer a proven range of Maximum and Medium Security Prison Doors, all of which are manufactured in compliance with the South African Department of Correctional Services standards, arguably the most stringent security standards world wide.

Having been based on the American Correctional Association standards our products are recognized internationally as being of world class standard.

The companies dedication to achieving and maintaining the most stringent quality assurance standards according to ISO 9002 guidelines, have earned a reputation for quality, consistency, and the adherence to a strict in-house tolerance specification.

Adherence to this stringent clearance and tolerance specification guarantees substantial economic advantages during the installation phase of our projects, as well as assuring that all contractual milestones are met.

JFE Security supplies a wide range of sliding and hinged doors, and accessories. The operation, control and maintenance of all of these doors is done via the JFE Integrated security management System (SMS).
